Angela and Monica: please see attached Summary for TF Vector Control (Harvey) activities, September 10, 2017 (1:00 PM CDT). DoD Aerial assets sprayed 540 gallons of Naled in the northern portion of Orange County last night; Clarke completed spray operations last night, and are scheduled to expand or conduct second missions in six county areas tonight; FEMA, TX DSHS, are awaiting a signed blanket statement from USDA for the Organic Farmer issue so that county judges will allow spray operations. Additional maps and information are provided for more clarity on spray missions. Ken
